

August 25, 2011

The TREM Center is pleased to announce that we will be hosting a roundtable as a part of Singapore International Energy Week.

**Date:** 1 November 2011

**Time:** 9.30am-12.30pm (break at 10.30-11am)

**Venue:** Suntec International Convention & Exhibition Centre, Singapore

**Register Here:** <http://www.globalsignin.com.sg/registration/siew2011/>

The Singapore International Energy Week (SIEW) is an annual week-long platform for energy professionals, policymakers and commentators to discuss and share best practices and solutions within the global energy space. In 2010, SIEW attracted 14,655 participants from over 60 countries. About 450 exhibitors took part and Singapore Prime Minister Lee Hsien Loong delivered the Singapore Energy Lecture.

Roundtables are short but intensive sessions, fielded by a moderator, and designed to involve a small cohort of participants engaging in debate and progressing their priorities in extended discussion. They also make excellent venues for giving and receiving targeted feedback and for meeting like-minded industry peers in in-depth debate on case studies or materials.

## **SIEW Technology and Rare Earth Metals for Clean Energy**

### **Roundtable:**

Minerals like lithium, cobalt, and rare earth elements are becoming increasingly strategic. The electric vehicle and renewable energy sectors face supply chain challenges and rising raw materials costs. Roundtable participants will:

- Understand the supply chain risks of lithium, cobalt, vanadium, rare earth elements, platinum group metals and more
- Formulate mitigation strategies
- Meet executives from the automotive, energy, recycling and mining industries
